

In-Class Programming

brought to you by

Billy Bishop Home and Museum

Owen Sound Marine & Rail Museum

Enjoy these programs at the Owen Sound Museums, and get a tour with your program!

Principles of Buoyancy Grade 2 and 3

We discuss the principles of buoyancy with a short video and water play. Learn why the Chi-Cheemaun floats and the forces that act on objects in the water. Lots of hands on fun.

Principles of Flight Grade 5 and 6

We discuss the forces that act on an airplane and the history of flight. Learn what it was like to be a fighter pilot in World War I and why we hold Billy Bishop as our hometown hero. Experiment with different toy planes to see which will fly the furthest.

Benefits of in-class programming:

- No bus fees
- No traveling
- No permission forms for field trips
- Programs compliment the Ontario Curriculum while teaching local history
- Get packages of classroom activities and **free passes** for your next museum trip

Let the field trip come to you!
